United States import statistics are compiled from information verified by Customs Examiners on import entries filed with Customs by importers. Under the direction of Lester D. Johnson, Acting Commissioner of Customs, the primary responsibility for the verification of import statistical information is assigned to the field and headquarters staff of the Division of Appraisement Administration.

Groupings of commodities in terms of the Geneva Agreement Categories and factors used in converting TSUSA quantities to category quantities were supplied by the Office of Textiles, Business and Defense Services Administration, Thomas J. Davis, Chief.

GENERAL EXPLANATION

COVERAGE

The statistics shown in this report include government as well as nongovernment shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from Puerto Rico and from United States possessions and shipments between these outlying areas are not reported as United States imports, but imports into Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped under Customs custody through the United States in transit from one foreign country to another is not reported as imports. Also excluded, effective January 1958, is information on imports valued under $100 reported on formal immediate consumption entries and information on imports reported on informal entries. (Informal entries, by definition, contain only items valued not more than $250.) Effective January 1962, warehouse entry shipments individually valued less than $100 are excluded. Articles not of cotton but classified for Customs purposes as cotton articles by similitude to cotton under the provision of the Tariff Act of 1930 (as amended) are also excluded.

The general import data represent total arrivals of imported goods (except for intransit shipments), i.e., merchandise released from Customs custody immediately upon arrival plus merchandise entered into bonded storage warehouse immediately upon arrival. These data differ from statistics on an import for consumption basis shown in most United States import statistical publications which represent imports of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival and merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels.

It is the objective of the compiling procedures, insofar as practical, to include shipments in the general import statistics for the month of import, which, in general, is based on the date of filing of the immediate consumption or warehouse entry.[1] However, because of processing problems, there has always been a carry-over of a small percentage of items from the proper month to a subsequent month (usually the month immediately following). The amount of this carry-over was increased a few years ago in order to take advantage of early released dates made possible with the use of electronic equipment. For cotton manufactures, however, the amount of carry-over is reduced substantially by special semi-monthly processing.

EMBARGOED (RESTRAINED) SHIPMENTS

Under the provisions of the Long-term Cotton Textile Arrangements, the United States may request a foreign country to limit its exports of certain cotton textiles to this country, or may act to restrain the importation of such cotton textiles in excess of a particular restraint level. In instances where the restraint is on imports, entries of such textiles into bonded storage warehouses after the restraint level is reached are excluded from the statistics in this report. The data are included, however, when the merchandise is withdrawn from warehouse and permitted entry into the domestic consumption channels, and are then included in import for consumption figures such as those presented in the FT 110, IM-145, etc.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report is the import entry (various Customs forms), which importers are required to file with Collectors of Customs. Statistical factors of country of origin, new quantity, value and Tariff Schedules of the United States Annotated (TSUSA) commodity classification are verified or corrected as necessary by Customs examiners on all formal consumption and warehouse entries. This verification of statistical data is made at the time the examiner reviews invoices and samples of merchandise for duty and other customs purposes, and the statistical copy of the entry is corrected by the examiner at that time if he finds that it does not accurately reflect the information called for by the statistical requirements.

[1] For shipments by vessel, merchandise is not included in the statistics prior to the date of formal entrance of the vessel (i.e., the date of the inward Customs manifest for the vessel).

COMMODITY INFORMATION

Data on cotton manufactures are presented in terms of 60 of the 64 commodity categories of cotton textiles enumerated in Appendix 3 to the GATT statement of July 21, 1961, entitled, "Arrangements Regarding International Trade in Cotton Textiles." Data for four categories (i.e., carded and combed lawns and voiles) are not shown separately. Information for carded lawns and voiles is included in this report under category 26, while data for combed lawns and voiles are included under category 27. Effective September 1963, the import statistics are reported by importers under the statistical classifications in the Tariff Schedules of the United States Annotated (TSUSA). The TSUSA numbers included in each cotton commodity category are shown in the table beginning on page i of the September-November 1963 report.

QUANTITY INFORMATION

The quantity reported in the statistics is in terms of the units of quantity set forth in Appendix 3 (see above) for the cotton textile categories. In instances where the reported quantity for a TSUSA commodity number is in terms of a unit of quantity other than that required for the category, the TSUSA quantity has been converted to the category quantity through the use of factors supplied by the Business and Defense Services Administration of the Department of Commerce. For groupings of commodities for which the unit of quantity pounds is reported, the weight represents the net weight of the commodity rather than the weight of the cotton component of the commodity only.

Abbreviations for units of quantity are shown immediately after the commodity description. The abbreviations being used are as follows:

Abbrev.	Description
DOZ	Dozen
DPR	Dozen Pair
LB	Pound
NO	Number
SYD	Square Yard

COUNTRY OF ORIGIN

The country reported in the statistics as the country of origin is defined as the country where the merchandise was produced or manufactured. Where the country of origin is not known, the country of shipment is shown and footnoted in this report. Countries are reported as defined in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Country names which are abbreviated in this report to save space are shown in full in Schedule C, together with descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of the country for statistical purposes. Schedule C is published as a part of TSUSA. A separate edition of Schedule C is also available free upon request to the Bureau of the Census.

REVISIONS TO PREVIOUS MONTHS' REPORTS

Significant revisions to data published in this report will be shown in the back of subsequent issues of the report.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics in general will be found in the Foreword to the latest edition of Foreign Commerce and Navigation of the United States. (Copies are available for reference at public libraries.) Prior to September 1960, regular subscribers to FT reports were automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification, etc.). Effective January 1961, this information on imports is included in the monthly issues of Report No. FT 110, United States Imports of Merchandise for Consumption, Commodity by Country of Origin. A Catalog of United States Foreign Trade Statistical Publications is also available. Reports providing additional detail compiled but not published can be obtained on a cost basis. For free copies of the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

PUBLICATION PROGRAM 1963 CENSUSES OF MANUFACTURES AND MINERAL INDUSTRIES

Results of the 1963 Censuses of Manufactures and Mineral Industries will be issued initially in preliminary reports which will furnish summary data. These reports will be superseded by more detailed final reports. An outline of the publication program is shown below.

PRELIMINARY REPORTS

Summary Series

Manufactures (2 reports). One report will present general statistics at the U.S. level for each 4-digit industry and 2- and 3-digit industry group. General statistics will also be presented for industries grouped according to market categories—durable and nondurable goods industries. A second report will provide general statistics without industry detail for regions, States, and large standard metropolitan statistical areas.

Mineral Industries (2 reports). One report will present general statistics at the U.S. level for each 4-digit industry and 2- and 3-digit industry group. A second report will provide general statistics by 2-digit industry group for regions and States.

Industry Series

Manufactures (about 370 reports). Separate reports for virtually all of the 430 manufacturing industries will give industry totals for general statistics for the United States and for regions and States. A product table in each report will give the quantity and value of shipments of the products classified in the industry for the United States.

Mineral Industries (about 45 reports). Separate reports for industries or for groups of industries for all of the 50 mineral industries will present general statistics for the United States and for regions and States. A product table will give the quantity and value of shipments of the products classified in the industry for the United States and for regions and States.

Area Series

Manufactures (51 reports). A separate report for each State and the District of Columbia will present general statistics for the State and for the larger standard metropolitan statistical areas within the State by 2-digit and selected 3-digit industries, and for most individual counties on an "all manufacturing" basis.

Subject Series

Manufactures (2 reports). One report will provide data on the number of establishments, employment, and value added by manufacturing for each 4-digit industry according to employment size of the establishment in each industry. A separate report will provide statistics on inventories for each 4-digit industry on a national basis; State data on inventories will also be provided.

Mineral Industries (one report). This report will provide number of establishments, employment, and value added in mining for each 4-digit industry according to employment size of the establishment in each industry.

FINAL REPORTS

All preliminary reports will be superseded by comparable final reports. After separate final reports have been issued, they will be assembled and reissued in cloth bindings as follows:
